SUMMARY

Backend developer focused on building systems with Go and understanding how software works under the hood. Interested in APIs, algorithms, and backend architecture. Currently developing a Kenyan local language corpus and dictionary platform focused on language preservation and community-driven translation.

TECHNICAL SKILLS

Languages: Go, Python, C, Bash

Backend & Concepts: REST APIs, HTTP Servers, JSON Handling, Algorithms, Validation, Testing, Graph Traversal (BFS) **Databases:** PostgreSQL, SQL

Tools & Technologies: Git, Linux, Docker, HTML/CSS, JavaScript

PROJECTS

[Loba](#) — Local Language Corpus & Dictionary Platform

Go, PostgreSQL, HTML/CSS, JavaScript

- Building a web-based platform for collecting and translating Kenyan local language vocabulary through community contribution
- Designing PostgreSQL schemas and backend APIs for structured language storage and contribution workflows
- Planning future web and mobile platform expansion

Lem-in — Pathfinding & Graph Traversal Project

Go

- Implemented BFS-based pathfinding and graph traversal logic for efficient room-to-room movement simulation
- Worked on graph validation, parsing, and algorithm optimization

Groupie Tracker — Artist Information Web Application

Go, HTML/CSS, JavaScript

- Built a web application integrating external APIs to display artist and band information dynamically
- Worked on HTTP request handling, JSON processing, and dynamic rendering

ASCII Art Web — Text Formatting Web Application

Go, HTML/CSS

- Developed a web application that transforms user input into stylized ASCII art through server-side processing

EDUCATION

Zone01 Kisumu — Software Development Program

March 2026 – Present

Maseno University — Bachelor's Degree in ICT Management

TECHNICAL WRITING & COMMUNITY INVOLVEMENT

- Writing technical articles on Go backend development and server fundamentals on [Dev.to](#)
- Attended technology community events including [BuildFromHere](#) and regional tech mini-conferences
- Participating in collaborative software development and hackathon activities through [Zone01 Kisumu](#)
